e-Business Cloud: ERP Integration

With Amalto, you can connect your ERP to the bigger picture to reduce manual workload and streamline your processes. The e-Business Cloud facilitates the exchange of all electronic documents between your ERP and all your Trading Partners, automating key processes such as sales order entry, Accounts Receivable, Logistics, and more. After a one-time setup, master data can be synchronized and transactional data exchanged between your ERP, your private e-Business Cloud and your Trading Partners (or any external system), speeding up all your important business processes — without burdening your IT department.

Integrate Your Way

Integrations between your internal systems (ERP, accounting software, CRM solution, etc.) and Amalto's fully managed e-Business Cloud can be:

- Asynchronous / batch
  - Leveraging any type of structured format (XML, CSV, TXT, proprietary, IDoc, Excel, etc.)
  - Using any transport / communication protocol

- Synchronous / real-time
  - API calls
  - Web service calls
  - Direct integration to the underlying database

Easily Integrate with Popular Solutions

SAP   ORACLE   JDEdwards Enterprise Software   salesforce   PeopleSoft

sage   Microsoft Dynamics NAV   Microsoft Dynamics AX   NETSUITE   GREAT PLAINS

TRUCKMATE   servicemax From GE Digital   TMW SYSTEMS   NAVISION software

Don't see your business software application listed? No worries.
Contact us and together we can work to develop the right connector.

Electronic Document Exchange

Send & receive electronic documents (+ related attachments) in virtually any structured format.

- EDI (ANSI X12, EDIFACT, etc.)
- TXT
- CSV
- JSON
- SAP iDoc
- Excel

Send & Receive Electronic Documents Via:

- AS2
- HTTPS
- RNIF
- SFTP
- FTPS
- SMTP (email)
- And more!

Types of Documents Supported:

- Quote
- Purchase Orders and Change Orders
- PO Confirmations
- Advance Shipping Notices
- Field Tickets
- Invoices
- Invoice Responses
- And more!

The e-Business Cloud is fully managed: Amalto performs implementation per your requirements and, once live, provides pro-active support and monitoring as well as application management.

Features & Benefits:

The Amalto fully-managed e-Business Cloud:

- Easily integrates with Enterprise Resource Planning (ERP) applications, billing software, field service solutions, databases, CRM solutions and any type of enterprise or accounting system.

- Possesses integration and workflow functions that are independent of ERP systems, providing flexible integration options should you need to connect with multiple applications used by different subsidiaries or departments.

Integrate Amalto with your ERP and experience:

- Costs reduction (less IT)
- Data accuracy (less errors)
- Increased Productivity
- Less rejections
- Improved Visibility

Seamless Integration with Amalto Products

By integrating with your ERP, you are able to have a full insight into how your business documents are being processed. The e-Business Cloud Reporting feature provides meaningful graphs and reports. Exchanged documents can trigger Workflows, for your employees to take action (for example approving an incoming PO or Invoice, completing missing / invalid data in outgoing documents, etc.)

About Amalto

Amalto is the Order to Cash company that provides innovative, fully-managed solutions enabling B2B integration and electronic document exchange services. We leverage state-of-the art technologies to facilitate the exchange of invoices and other important business documents between B2B Trading Partners in a quick, secure and cost-effective manner. Regardless of the complexity of the exchange process, the type of document, or diverseness of back-office systems, Amalto has the expertise to implement the right solution. Our seasoned professionals possess complementary expertise and a broad range of experience in e-business. We apply this vast knowledge by recommending perfectly adapted and innovative solutions to transform your way of doing business.
